a history of engineering and technology offers a highly readable account of the development of engineering and technology from prehistory to the present the author uses the broad sweep of history as a backdrop for expositions of important benchmarks in engineered works and products the book presents early hydraulic engineering in the context of modern ideas relating technology to the complex social structures that arose in sumeria and egypt it also provides a comprehensive and objective review of the greatest engineering civilization of antiquity greco roman and discusses the western world s attempts to recover its achievements after the middle ages the flowering of french and british engineered technology is portrayed through the men and machines that led to today s industrial society other topics discussed in a history of engineering and technology include the evolution of the modern ship engineering in modern war and medicine the advent of the computer and the space age over 100 illustrations and the book s in depth presentation of key theoretical developments make this volume essential as a college textbook for students as well as an important reference resource for libraries engineers and scientists

the volume includes a set of selected papers extended and revised from the 2011 international conference on mechanical engineering and technology held on london uk november 24 25 2011 mechanical engineering technology is the application of physical principles and current technological developments to the creation of useful machinery and operation design technologies such as solid models may be used as the basis for finite element analysis fea and or computational fluid dynamics cfd of the design through the application of computer aided manufacturing cam the models may also be used directly by software to create instructions for the manufacture of objects represented by the models through computer numerically controlled cnc machining or other automated processes without the need for intermediate drawings this volume covers the subject areas of mechanical engineering and technology and also covers interdisciplinary subject areas of computers communications control and automation we hope that researchers graduate students and other interested readers benefit scientifically from the book and also find it stimulating in the process

the ever increasing awareness and growing focus on environmental issues such as climate change and energy use is bringing about an urgency in expanding research to provide possible solutions to these problems through current engineering research and emerging technologies scientists work to combat modern environmental and ecological problems plaguing the globe advanced methodologies and technologies in engineering and environmental science provides emerging research on the current and forthcoming trends in engineering and environmental sciences to resolve several issues plaguing researchers such as fossil fuel emission and climate change while highlighting these challenges including chemical toxicity environmental responsibility readers will learn how engineering applications can be used across disciplines to aid in reducing environmental hazards this book is a vital resource for engineers researchers professors academicians and environmental scientists seeking current research on how engineering tools and technologies can be applied to environmental issues

fostering human development through engineering and technology education etc is a collaborative work offered to students scholars researchers decision makers curriculum developers and educators interested in the rich learning opportunities afforded by engineering and technology education this book provides perspective about the roles etc might uniquely play in applying contemporary pedagogical practices to enhance students intellectual cognitive and social skills in the service of promoting equitable and sustainable human development education about engineering and technology has become an imperative for all people due to the exponential rate of technological change the impact of globalization on culture and economy and the essential contributions engineering and technology make in addressing global and environmental challenges many of today's students wish to use their education to influence the future and school based engineering and technology education programs meet the needs of these millennial students who are civic minded team oriented and want to make a difference therefore support has been rapidly increasing for the establishment of school based engineering and technology education etc programs in many countries across the globe chapters in this book provide discussion about dimensions of learning capabilities concepts and skills for third millennial learners culturally relevant learning through etc and the promise of new pedagogies such as gaming and other project based learning approaches in our digitally connected world the author team includes renowned educational theorists cognitive scientists scientists and engineers instructional designers expert practitioners and researchers who have coalesced best practice and contemporary thought from seven countries

with the unprecedented increase in the world's population the need for different food processing techniques becomes extremely important and with the increase in awareness of and demand for food quality processed products with improved quality and better taste that are safe are also important aspects that need to be addressed in this volume experts examine the use of different technologies for food processing they look at technology with ways to preserve nutrients eliminate anti nutrients and toxins add vitamins and minerals reduce waste and increase productivity topics include among others applications of ohmic heating cold plasma in food processing the role of biotechnology in the production of fermented foods and beverages the use of modification of food proteins using gamma irradiation edible coatings to restrain migration of moisture oxygen and carbon dioxide natural colorants as opposed to synthetic coloring which may have toxic effects hurdle technology in the food industry the unrecognized potential of agro industrial waste

this book gathers selected papers presented at the international conference on innovations in information and communication technologies ici2ct 2020 held at national university of singapore singapore during 18 19 december 2020 it presents the works on the intersection of the computer science and communication engineering topics covered in the book include communications engineering internet and web technology computer and information science artificial intelligence data science and management and ict applications
