what are the underlying rationales for industrial policy does empirical evidence support the use of industrial policy for correcting market failures that plague the process of industrialization to address these questions the authors provide a critical survey of the analytical literature on industrial policy they also review some recent industry successes and argue that only a limited role was played by public interventions moreover the recent ascendance of international industrial networks which dominate the sectors in which less developed countries have in the past had considerable success implies a further limitation on the potential role of industrial policies as traditionally understood overall there appears to be little empirical support for an activist government policy even though market failures exist that can in principle justify the use of industrial policy
